Evening Brief

Date: Monday September 10th, 2018

Weather Summary

A strong area of low pressure will track across the Pacific NW/Northern Rockies this week bringing very strong winds to much of the Great Basin, particularly Nevada and Utah on Tue/Wed.

On Tuesday the cold front moves into northwest Idaho decreasing temperatures by about 10-15 degrees. Winds strengthen over western NV and UT on Tuesday with gusts over 45-50 mph possible. Minimum relative humidity will remain between 6-8% over NV for critical fire weather conditions.

These strong winds continue on Wednesday and Thursday over portions of central and southern NV and UT as the cold front tracks through the central Great Basin. Isolated showers are possible over the far northern forests on Wed/Thu.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	3	Light Initial Attack Activity
National	3	GB New Fires and Acres: 5 fires 308.8 acres; 216 acres large fire growth

Great Basin Fuel Status [interactive link](#) (Use Edge, Chrome or Firefox browsers)

Fuels and Fire Behavior advisory has been issued for [Northern Great Basin](#)

Fuels/Fire Potential

Fuels have moderated slightly over the last few days, however ERCs are still in the 80th - 90th percentile in many areas of Idaho, northern Nevada and northern Utah.

Heavier 1000-hr fuels are still well below normal in many of these areas and near record lows for the time of year in some locations.

ERC's are below the 50th percentile across most of the southern third of Nevada, and Utah, into the AZ Strip.

Sagebrush Live Fuel Moisture levels across the northern half of the Great Basin are near or just below early September normals as low as 65-80% in many areas of Northern Nevada, NW Utah, and far Southern Idaho. Grasses are cured in all areas.

Fuels will likely gradually modify this coming week, especially across northern areas, due to cooler temperatures and higher humidity, despite the stronger expected winds.

Resources

Aviation within the Great Basin

- 1 VLAT's, 5 LATs, 0 CL-415's
- 21 SEATs, 2 Fire Bosses
- 12 Type 1 Helicopters / 12 Committed
- 14 Type 2 Helicopters / 14 Committed
- 21 Type 3 Helicopters

Crews Committed within the Great Basin

- 13 IHCs Committed / 1 Available
- 21 T-2 IAs Committed / 2 Available

Current Incident Details
